
Daniel Osei

Backend Engineer

daniel.osei@example.com | +1 (415) 555-0182 | San Francisco, CA
danielosei.dev | github.com/danielosei | linkedin.com/in/danielosei

Professional Summary

Backend engineer with 4 years of experience building high-throughput APIs and event-driven systems in fintech.

Skills

Languages: TypeScript, Go

Frameworks: Node.js

Cloud: PostgreSQL, AWS

Tools: Docker, Kubernetes

Work Experience

Senior Backend Engineer - Fintrace Inc.

San Francisco, CA | Feb 2023 - Present

- Led the redesign of the payments ingestion pipeline, cutting p99 latency by 42%.
- Mentored two junior engineers and ran the on-call rotation for 6 months.
- Designed a rate-limiting layer that reduced abuse-related incidents by 90%.

Technologies: Go, PostgreSQL, Kafka, AWS

Backend Engineer - Ledgerly

Remote | Jun 2021 - Jan 2023

- Built the reconciliation service handling 2M+ transactions/day.
- Migrated legacy cron jobs to an event-driven architecture using Kafka.

Technologies: TypeScript, Node.js, Kafka

Software Engineer - StartHub

New York, NY | Jan 2020 - May 2021

- Built the MVP API for an early-stage marketplace startup as employee #4.

Technologies: Node.js, PostgreSQL

Projects

rate-limiter-go | ratelimiter.dev

Aug 2023

- An open-source sliding-window rate limiter for Go services, used internally at Fintrace.

Technologies: Go, Redis

Education

B.S. in Computer Science

University of Michigan | 2016 - 2020

Certifications

AWS Certified Solutions Architect - Amazon Web Services | Apr 2022
